### OLD TIMER OF THE WEEK

This weeks honored employee LINCOLN STELL was born at Fordyce, Arkansas and did not come north until his separation from the service at which time he stayed in Chicago and worked at International Harvester and Wilson Jones there before coming to work at Bradley on November 8, 1948. Hired as a Time Study Engineer, his entire Bradley Roper Career has been spent in the Time Study and Methods fields. On supervision since 1964 his current job title is Standards Engineer.

During World War II LINC enlisted and spent thirty-seven months in the Navy, most of it in Hawaii. A 1st Class Medical Corpsman he was stationed at Aiea Naval Hospital in Honolulu where his principal job was barbering although he also stood watch on the wards.

LINC and his wife THELMA have been married twenty-six years and live in Limestone Township with their two sons. STEVE 20 will be graduating this month from Valparaiso Electronics School and GREG 18 graduates from Herscher High School.

This Old Timer still holds a Barber's License but admits the profession has suffered in the last few years. He used to do quite a bit of boating, but now his principal hobbies are travel and golf, both of which he enjoys a great deal.

### COLD DRINKS

Too much iced tea, iced water or other cold drinks can cause a summer sore throat. "What happens is that the prolonged cold cools the throat membranes," explained Dr. James S. Feurig, director of Olin Health Center at Michigan State University. As a result, circulation in the throat membrane slows and the tiny blood and lymph vessels narrow, keeping natural germ-resistant agents from reaching the throat and fighting off germs. Drink cold drinks at intervals instead of one after another, advises Dr. Feurig. This allows the throat to return to normal body temperatures and build up its defenses. (This means beer - unless someone else is buying.)
